CONTENTS

Characteristics of commonly-used U.S. coals—towards a set of standard research coals 1
K. L. SMITH and L. D. SMOOT

Devolatilization and combustion characteristics of coal particles 55
S. C. SAXENA

Scavenging the two-stroke engine 95
E. SHER

Rate-controlled constrained-equilibrium theory of chemical reactions in complex systems 125
J. C. KECK

A review of experimental studies of knock chemistry in engines 155
T. A. LITZINGER

Fireside corrosion in pc-fired boilers 169
J. N. HARB and E. E. SMITH

A special issue on Ash Deposition 191

SUBJECT INDEX

Additives
  for deposit remediation 213
  in coal-fired gas turbines 226, 229
Air heater pluggage 238
Alkali removal from flue gases by solid sorbents 205
Alkali transformations
  in combustion systems 303
  vapor phase 303
Alkalies, in coal combustion 243
Alumina, additives for deposit remediation 213
Aluminosilicate clays, additives in coal-fired gas turbines 229
Anthracite 5
Ash analyses in coal feed and at furnace exit 333
Ash deposits, properties of 333
Ash formation from mineral matter 267
Ash properties at furnace exit 333
ASTM D121 15
ASTM D388–84 4, 15
ASTM D3172 15
ASTM D3176 15

Bauxite for alkali removal from hot flue gases 205
Boehmite, additives for deposit remediation 213
Boilers
  coal-fired, coal ash deposition 235
  corrosion in. *See* Corrosion
  furnace wall slag 236
  slag-tap 236
  wet-bottom 236

Calcium in coal combustion 243
CCSEM 270, 289–300, 319
CH_4/O_2 system 152
Char production and characterization 196, 198
Chemical equilibrium 129, 138
Chemical fractionation 195, 196
Chemical rate equations 133
Chemical reactions
  conventional treatments of 136
  entropy production in 136
  in complex systems 125
CHEMKIN chemical kinetics code 305
CO freezing in steady flow burner 146
Coal
  alternate methods for rank determination 6
  analysis 13, 332
  ANL standard 23
  ASTM methods for characterization 14
  ASTM rank 4
  basic elements in combustion 243
  biochemical coalification 9
  bituminous 5, 270, 271, 273, 288, 300, 307, 327
  calorific value 15
  char surface properties and oxidation rates 45
  characteristics of 1, 35
  characterization 13–15
  chromatography 18, 44
  classification 4
    according to grade 6
    profile chart 7
  coalification process 9
  databases 19, 20, 37
  description of 3

Coal ash
  composition 36

deposition
classification system 235
in coal-fired gas turbines 213, 221
in coal-fired utility boilers 235
in heat exchanger tube 327
formation mechanisms 195
Coal combustion
alkali transformations 303
illite transformations 293
mineral particle size distribution 261
minerals transformation 267
pyrite transformations and deposition characteristics 281
research studies 39
Coal-fired gas turbines 213, 221
Coal particles
char particle combustion in fluidized bed 88
combustion 82
devolatilization 55
chemical models 63
experimental investigations 79
heat transfer limitations 70
mass transfer limitations 71
mechanisms and kinetics 62
multi-reaction models 64, 65
phenomenological models 63
pyrolysis reactions 63
qualitative features 58
secondary reactions 75
tar characteristics 75
transport limitations 68
fraction of impacting particles depositing 339
mathematical models for char particle combustion 85
mineral composition variation in 323
particle size distribution of mineral grains 261
pyrolysis
general characteristics 65
product composition 67
yield 66
sticking probabilities 337
Combustion behavior of basic elements 243
Combustion/deposition entrained reactor (CDER) 223
Combustion gas boundary layers, particle transport across 253
Combustion products, reactions in 146
Complex systems, chemical reactions in 125
Computer-controlled scanning electron microscopy (CCSEM) 195, 196, 243, 262
Constrained equilibrium 129, 130, 139
thermodynamics of 131
Convection pass fouling 238
Corrosion
furnace wall tubes 170
corrosive deposits 174
effects of chlorine 177
gas phase reactions 176
influence of coal 177
morphology 171
reducing conditions 171
pc-fired boilers 169
superheater/reheater 179
effect of alloy composition 182
factors influencing 179
mechanism of corrosion 185
sustained corrosion 186
temperature conditions 179
tube protection 185

Degree of disequilibrium 135
in I.C.E. combustion products 149
Deposit formation in coal-fired gas turbines 213
Deposit growth, expression for 341
Deposit growth model 337
Deposit remediation in coal-fired gas turbines 213
Di-isobutylene (DIB) 158

Emathlite
additives in coal-fired gas turbines 229
for alkali removal from hot flue gases 205
Energy constraint 127
Energy dispersive X-ray analysis (EDAX) 284, 286, 289–90, 297
Entropy production in chemical reactions 136

Flue gases, alkali removal by solid sorbents 205
Fly ash production and characterization 196, 198

Gas turbines, coal-fired 213, 221

Heat exchanger tube, coal ash deposition 327
n-heptane 158
H_2/O_2 system 150

Illite
analysis of 294
characterization techniques 295
equilibrium behavior 294
evolution of particle size distribution of excluded and included 298
iron transformations during heating 297
particle stickiness behavior 300
potassium transformation during heating 297
Silver Hill 294, 298
structural transformations 295
transformations during coal combustion 293
Illite-loaded char, analysis of 294
Independent particle model 128
Iron
in coal combustion 243
phase distribution for transformed pyrite 286
transformations in illite during heating 297
Iso-octane 158

Kaolin additives
for deposit remediation 213
in coal-fired gas turbines 229
Kaolinite for alkali removal from hot flue gases 205
Knock chemistry 155
additive effects 157
fuel structure effects 156
pre-combustion heat release studies 159
pre-reaction effects 157
rapid sampling valve studies 162
spectroscopic investigations 161
K_2O-Al_2O_3-SiO_2 system 294
K-XANES spectra 297

Lagrange multipliers 127
rate equations for 134
Lignite 5
characterization 196, 197
North Dakota Beulah 274
San Miguel Texas 277
transformations of inorganic constituents during combustion 195
Limestone additives in coal-fired gas turbines 226

Linear independence of constraints 131
Linear rate equations 136
Low temperature fouling 238

Macrostate 126
Malvern 2600C Particle Size Analyser 295
Maximum entropy principle 126
Microstate 126
Minerals
  composition variation in coal particles 323
  distribution in pulverized coal 319
  inclusions in coal 330
  transformation during pulverized coal combustion 267
  see also under specific minerals
Mössbauer spectroscopy 243, 282, 286, 295
Multiple temperature gas mixtures 130

NO concentrations in I.C.E. 147
Normalization constraint 127

O-system 138

Particle deposition rate theory 255
Particle size distribution
  evolution of excluded and included illite 298
  minerals in coal combustion 261
Particle structure evolution during oxidation 282
Particle transport across combustion gas boundary layers 253
Photophoresis
  effects of 257
  particle diffusivities 254
Potassium transformations in illite during heating 297
Primary combustion reactions 149
Pseudo-steady-state approximation (PSSA) 137
  versus RCCE 137
Pyrite 261
  behavior in coal combustion experiments 288
  deposition characteristics under coal combustion 281
  fragmentation during coal heatup 264
  fragmentation during oxidation 288
  particle stickiness behavior 287
  transformations
    during coal combustion 281
    iron phase distribution 286

Rate-controlled constrained equilibrium (RCCE) 126, 133
  advantages and disadvantages 153
  O-system 142
  practical applications 146
  versus PSSA 137
Rate equations
  for constraints 134
  for Lagrange multipliers 134
  integration of 136
Reheaters, corrosion. *See* Corrosion

Scanning electron microscopy (SEM) 245
Scanning electron microscopy point count (SEMPC) 196
Scavenging of two-stroke engines 95

  static model tests 102
  three-zone model 113
Shifting equilibrium 136
Silica 261
  particle size distribution during coal heatup 265
Sodium–chlorine system, model development 307
Sodium species in flame and post-flame zones of pulverized coal combustors 303
Sodium sulfate
  formation in coal-fired boiler systems 306
  vapor phase 303
Sodium/sulfur chemistry in flames 311
Sodium–sulfur system, model development 306
Sodium system, model development 305
Stack deposits 239
Statistical thermodynamics 126
Sticking probability relation to temperature and composition 337
Sulfur sorbents, additives in coal-fired gas turbines 226
Superheaters
  corrosion. *See* Corrosion
  slagging 237

Thermal diffusion factor 254
Thermodynamic variables 132
Thermodynamics of constrained equilibrium 131
Thermophoresis
  effects of 257
  particle diffusivities 254
Tricalcium silicate, additives in coal-fired gas turbines 226
Two-stroke engines, scavenging. *See* Scavenging of two-stroke engines

XAFS spectroscopy 243, 295
X-ray absorption near-edge structure (XANES) 295
X-ray diffraction (XRD) 295

CONTENTS OF PREVIOUS VOLUMES

VOLUME 1

Pollution Formation and Destruction in Flames — Introduction
N. A. CHIGIER

The First Half-Million Years of Combustion Research and Today's Burning Problems
F. J. WEINBERG

Kinetics of Pollutant Formation and Destruction in Combustion
C. T. BOWMAN

Mathematical Modeling of Pollutant Formation
L. S. CARETTO

Mixing and Chemical Reaction in Continuous Combustion
D. T. PRATT

Turbulent Jet Diffusion Flames
R. W. BILGER

Gas Turbine Engine Pollution
A. M. MELLOR

Pollution Formation and Control in Spark-Ignition Engines
J. B. HEYWOOD

Analysis of Pollutant Formation and Control and Fuel Economy in Diesel Engines
N. A. HENEIN

VOLUME 2

NO_x Control for Stationary Combustion Sources
A. F. SAROFIM and R. C. FLAGAN

The Characterization and Evaluation of Accidental Explosions
R. A. STREHLOW and W. E. BAKER

Fluidized Bed Combustion of Coal for Power Generation
D. ANSON

Combustion and Heat Transfer in Large Boiler Furnaces
A. M. GODRIDGE and A. W. READ

The Atomization and Burning of Liquid Fuel Sprays
N. A. CHIGIER

Fossil Energy Research and Development in ERDA
P. C. WHITE

Flaring in the Energy Industry
T. A. BRZUSTOWSKI

Turbulence and Turbulent Combustion in Spark-Ignition Engines
R. J. TABACZYNSKI

Fundamentals of Oil Combustion
A. WILLIAMS

Geothermal Energy Development
H. C. H. ARMSTEAD

Combustion Fundamentals Relevant to the Burning of Natural Gas
P. F. JESSEN and A. MELVIN

VOLUME 3

The Use of Laser Raman Diagnostics in Flow Fields and Combustion
S. LEDERMAN

Gasification: Theory and Application
K. LITTLEWOOD

Non-Electrical Uses of Geothermal Energy
E. BARBIER and M. FANELLI

The Gas-Phase Oxidation of Hydrocarbons
G. MCKAY

Synthetic Fuels and Combustion
J. P. LONGWELL

Future Fuels and Mixture Preparation Methods for Spark Ignition Automobile Engines
W. BERNHARDT

Molecular Beam Mass Spectrometry for Studying the Fundamental Chemistry of Flames
J. C. BIORDI

Instrumentation Techniques for Studying Heterogeneous Combustion
N. A. CHIGIER

Current Status of Droplet and Liquid Combustion
G. M. FAETH

A Review of Drop Size Measurement — The Application of Techniques to Dense Fuel Sprays
A. R. JONES

Propagation of Laminar Pulverized Coal — Air Flames
L. D. SMOOT and M. D. HORTON

VOLUME 4

Laminar and Turbulent Gas Dynamics in Combustors — Current Status
R. B. EDELMAN and P. T. HARSHA

Nuclear Process Heat for Coal Gasification and Hydrogen Production
K. F. KNOCHE

Gas Turbine Engine Emissions — Problems, Progress and Future
R. E. JONES

Fifty Years of Combustion Research at General Motors
W. G. AGNEW

Combustion Noise
W. C. SRAHLE

Future Jet Fuel Combustion Problems and Requirements
W. S. BLAZOWSKI

Reducing Inefficiency and Emissions of Large Steam Generators in the United States
B. P. BREEN and J. G. SOTTER

Heterogeneous Kinetics of Coal Char Gasification and Combustion
N. M. LAURENDEAU

VOLUME 5

Mineral Matter in Coal and the Thermal Performance of Large Boilers
T. F. WALL, A. LOWE, L. J. WIBBERLEY and I. McC. STEWART

Coal Dust Flames: A Review and Development of a Model for Flame Propagation
JOHN L. KRAZINSKI, RICHARD O. BUCKIUS and HERMAN KRIER

Scattering of Electromagnetic Radiation in Particulate Laden Fluids
A. R. JONES

Combustion Modeling in Two and Three Dimensions — Some Numerical Considerations
HENRY McDONALD

Phenomenological Models for Reciprocating Internal Combustion Engines
PAUL N. BLUMBERG, GEORGE A. LAVOIE and RODNEY J. TABACZYNSKI

Research and Development by British Gas into the Effective Use of Gas in Industry
M. L. HOGGARTH

***In Situ* Combustion Retorting of Oil Shale**
MELVYN C. BRANCH

Basic Considerations in the Turbulent Flame Propagation in Premixed Gases
JERZY CHOMIAK

Particulate Formation in Power Station Boiler Furnaces
M. A. NETTLETON

Incineration of Industrial Waste
R. K. TANNER

Combustion Diagnostics by Laser Raman and Fluorescence Techniques
ALAN C. ECKBRETH, PAUL A. BONCZYK and JAMES F. VERDIECK

VOLUME 6

Solar Collectors for Low and Intermediate Temperature Applications
F. KREITH, G. O. F. LOF, A. RABL and R. WINSTON

Nitric Oxide Formation from N_2 in Flames: The Importance of "Prompt" NO
A. N. HAYHURST and I. M. VINCE

The Trace Element Chemistry of Coal During Combustion and the Emissions from Coal-Fired Plants
R. D. SMITH

Unconfined Vapour-Cloud Explosions: Definition of Source of Fuel
D. J. LEWIS

Spread and Evaporation of Liquid
F. BRISCOE and P. SHAW

Methods for Predicting the Atmospheric Dispersion of Massive Releases of Flammable Vapour
R. A. COX

Unconfined Vapour-Cloud Explosions — Historical Perspective and Predictive Method Based on Incident Records
D. J. LEWIS

Risk Assessment Methods for Vapour-Cloud Explosions
L. CAVE

Catalysts for Automobile Emission Control
J. T. KUMMER

Fundamental Coal Combustion Mechanisms and Pollutant Formation in Furnaces
J. O. L. WENDT

The Hydropyrolysis of Coal to BTX
G. FYNES, W. R. LADNER and J. O. H. NEWMAN

Airblast Atomization
A. H. LEFEBVRE

Soot Control By Fuel Additives
J. B. HOWARD and W. J. KAUSCH, JR

A Review of Combustion Processes in the Dual Fuel Engine — The Gas Diesel Engine
G. A. KARIM

Post Combustion Methods for Control of NO_x Emissions
H. S. ROSENBERG, L. M. CURRAN, A. V. SLACK, J. ANDO and J. H. OXLEY

The Determination of Laminar Burning Velocity
C. J. RALLIS and A. M. GARFORTH

Perspectives for Metal Hydride Technology
H. BUCHNER

Semi-Empirical Correlations for Gas Turbine Emissions, Ignition and Flame Stabilization
A. M. MELLOR

The Mechanisms of Transition from Deflagration to Detonation in Vapor Cloud Explosions
J. H. S. LEE and I. O. MOEN

VOLUME 7

Detailed Modelling of Combustion Systems
E. S. ORAN and J. P. BORIS

Mechanisms of Heat Transfer Between a Surface and a Gas-Fluidized Bed for Combustor Application
S. C. SAXENA and J. D. GABOR

A Review of Initial Comparisons of Computed and Measured Two-Dimensional Unsteady Flame Fields
F. V. BRACCO and P. J. O'ROURKE

The Kinetics of Thermochemistry of Chemical Oxidation with Application to Combustion and Flames
S. W. BENSON

Product Formation Mechanisms Inside a Burning Cigarette
R. R. BAKER

Automotive Engines and Fuels: A Review of Future Options
J. B. HEYWOOD

Solar Cooling and Air Conditioning
G. GROSSMAN and A. JOHANNSEN

Soot Formation
B. S. HAYNES and H. GG. WAGNER

Fundamentals of Soot Formation in Flames with Application to Diesel Engine Particulate Emissions
O. I. SMITH

Multidimensional Numerical Simulation of Reactive Flow in Internal Combustion Engines
T. D. BUTLER, L. D. CLOUTMAN, J. K. DUKOWICZ and J. D. RAMSHAW

VOLUME 8

Modeling of Unsteady Two-Phase Reactive Flow in Porous Beds of Propellant
S. S. GOKHALE and H. KRIER

Flame Radiation
C. L. TIEN and S. C. LEE

Fuel Atomization for Spray Modelling
M. M. ELKOTB

Counterflow Diffusion Flames
H. TSUJI

Sunfuels
R. J. KING

Production and Use of Biogas in Agriculture
P. N. HOBSON and N. E. H. FEILDEN

Turbulent Hydrocarbon Jet Flames
H. EICKHOFF

Recent Advances in Droplet Vaporization and Combustion
C. K. LAW

Conditional Sampling in Turbulent Combustion
P. A. LIBBY, N. CHIGIER and J. C. LARUE

Liquid Fuels for Transport
E. M. GOODGER

Sulphate Capture in Ash and Boiler Deposits in Relation to SO_2 Emission
E. RAASK

Coal Gasification—Combined Cycles for Electricity Production
T. D. BROWN

Entrainment Interface in Free Turbulent Shear Flows
R. CHEVRAY

Urban and Wildland Fire Phenomenology
F. A. WILLIAMS

VOLUME 9

Evaporation and Combustion of Sprays
G. M. FAETH

Critical Requirements in Combustion Research
L. D. SMOOT and S. C. HILL

Turbulence Properties of Flames and their Measurement
R. GUNTHER

Drop Size and Velocity Instrumentation
N. CHIGIER

Heat Pumps — Applications for Heating Conservation and Heat Recovery
E. NEAL

Toxicology of Soot
T. R. BARFKNECHT

A Perspective of Reciprocating-Engine Diagnostics without Lasers
C. A. AMANN

The Role of Pore Structure in Coal Pyrolysis and Gasification
G. A. SIMONS

Fuel Droplet Vaporization and Spray Combustion Theory
W. A. SIRIGNANO

Finding Order in Coal Pyrolysis Kinetics
P. R. SOLOMON and D. G. HAMBLEN

VOLUME 10

Chemical Kinetic Modelling of Hydrocarbon Combustion
C. K. WESTBROOK and F. L. DRYER

Thermal Radiation Hazards from Hydrocarbon Pool Fires
K. S. MUDAN

Coal Combustion and Applications
A SPECIAL ISSUE PREPARED BY THE DOE COAL COMBUSTION AND APPLICATIONS WORKING GROUP

Heat and Mass Transfer in Combustion: Fundamental Concepts and Analytical Techniques
C. K. LAW

Laminar Diffusion Flamelet Models in Non-Premixed Turbulent Combustion
N. PETERS

Small Industrial-Scale Producer Gas Units
A. BLIEK, W. P. M. VAN SWAAIJ and K. R. WESTERTERP

Pulverized-Coal Combustion Research at Brigham Young University
L. D. SMOOT, P. O. HEDMAN and P. J. SMITH

VOLUME 11

Dynamic Behavior of Premixed Flame Fronts in Laminar and Turbulent Flows
P. CLAVIN

Fuel Combustion in the Blast Furnace Raceway Zone
J. M. BURGESS

Theory of Normal Premixed Turbulent Flames Revisited
P. A. LIBBY

The Mode of Occurrence and Concentration of Trace Elements in Coal
